

# SEOUL, GREEN CULTURE

## Garden for the Ten Million

Seoul is building a garden city through green culture into a place where nature and urban life come together.

Gardens go beyond green space. They become a living part of culture, holding layers of Seoul's history and K-culture.

Garden City Seoul brings nature and urban culture together, enriching everyday life.

The 2026 Seoul International Garden Show unfolds across Seoul Forest, the Hangang River, and Seongsu-dong, bringing together 167 gardens. As each space connects in a continuous line, the park is no longer seen as a series of separate points but as a single continuous flow embracing the city as a whole.
