

Gardens of Co-creation

Four Gardens by Citizens and Designers

Designer Garden

A1 Maeheon Supjeongi: From Forest to Table

At Maeheon Citizen's Forest, we reimagine the traditional Korean Supjeong-i, a communal village woodland. Through the competition, coexistence, and succession of young oaks, we envision a forest that will grow into our everyday a century from now.

_Kim Dan Bee

A2 Green Curation

Discover a new landscape of familiar plants. Curated through form, color, fragrance and texture, this garden invites the visitors to discover and harvest their own sense of greenery through the changing seasons.

_Kim Hyun Jung · Lee Sung Won

A3 Layers of Time, Streams of Light

This garden honors four decades of the forest's existence and the heartfelt devotion of our citizens. Beneath the forest canopy, the stone walls, flat rocks, and water basins help you sense the texture of passing time.

_Choi Jin Beom · Choi Jung Min

A4 Between the Benches

Six plant strips between the linear benches form a small forest lab shaped by citizens and students. This is a participatory forest garden reflecting time and engagement, where seasonal changes of plants are observed and recorded over time.

_Song Jae An

Gardens among the Forest

Stories of Six Corporations and Agencies

Corporate · Agency Garden

B1 Doggy Park

CESAR believes that pets are not just part of our lives, but become our lives. Doggy Park is a space where dogs are invited to explore the area using their senses, experiencing it in their own speed.

_MARS Korea

B2 The Garden of Heart

The Garden of Heart embraces the weight of unspoken thoughts. Take a deep breath among the trees and the heart stone in the center of the forest. Use the 'SOS Line' to speak with a counselor for any disheartening matters. Our garden will quietly embrace your heart.

_Life Insurance
Philanthropy Foundation

B3 Star Friends Garden

Sponsored by KB employees, 'Star Friends Garden' invites children to nurture their hopes and dreams. Located in a 40-year old forest, this garden features 'Feelings Forest' where five senses experience the nature, 'Searching Forest' where forest materials are collected, and 'Decorating Forest' where the materials are used to decorate personalized space and characters.

_KB Kookmin Bank

B4 Little Wet Forest

With respect for the earth and mankind, part of L'OCCITANE's sustainability effort, we created a small seasonal wetland to contribute to urban biodiversity. Paying respect to the 13 cypress trees that have stood here for three decades, the garden becomes a multi-species habitat for the plants, insects and birds.

_L'OCCITANE Korea

B5 Partners Of Oasis Making Garden

POOM Garden reinterprets the values of SGI, whose mission is to guard the dreams and the everyday, using the language of nature. Shifting the financial concepts of insurance and security into an act of 'embracing', this garden expresses the warm consolation and connection provided by the nature.

_Seoul Guarantee Insurance

B6 Forest as One

The trees that citizens planted four decades ago have grown into Maeheon Citizen's Forest today. At 'Forest as One', Hyundai Motor Company · Kia Corporation realizes the values of sustainability by paying respect to the depth of time in the forest started by the citizens.

SEOUL, GREEN CULTURE

Citizen's Garden

Seoul dreams of a garden city
where the nature and citizens' lives come together
through GREEN CULTURE.

Maeheon Citizen's Forest, where autumn colors
lay over the sylvan forest, is reborn into a new garden
in the hands of garden designers, corporations,
students and citizens.

Walk along the welcoming gardens by the citizens to
add autumn affluence to your everyday life.

Seoul Forest SIGS and Maeheon Citizen's Forest SIGS
will both run until October 27th, 2026.
